COMMISSION ON DECLINING SCHOOL ENROLMENTS IN ONTARIO (CODE)

JUNE, 1978

TORONTO, ONTARIO

All tables in this report were prepared
by the Educational Data Processing
Branch, Ministry of Education, under
contract to CODE.

The tables given below address the issue of surplus school space by showing, for each school board, the number of schools and the corresponding enrolment by percent occupancy for three levels of "loading".

Percent occupancy for any given school is the number of pupils in the school (in headcounts) as of September 30, 1976 as taken from the 1976 September School Report divided by the rated pupil capacity for that school as taken from the 1977 School Plant file maintained by the Ministry of Education. For example, the percent occupancy of a school with a rated capacity of 400 pupil places and a September 30, 1976 enrolment of 200 pupils would be 50%.

The rated capacity of a school is determined by the Ministry of Education by allocating a specific number of pupil places to each type of classroom in a school. For example, a regular elementary classroom is rated at 35 pupil places, a regular secondary classroom at 30 pupil places, a shop classroom at 20 pupil places, and libraries and gyms at zero pupil places. The result is the total number of pupil places available in that school. This is termed the rated capacity of the school at 100% loading.

However, it is not reasonable (largely from a statistical point of view) to expect a school to operate at 100% loading with each class filled exactly to capacity. To this end, the Ministry considers a school to be "full" for new building purposes if 90% of the pupil places are occupied. This is termed 90% loading and the percent occupancy at 90% loading of a school with 400 pupil places and 200 pupils is 55.6% ($200 \div (400 \times 0.9) \times 100$).

Some school boards consider a school to be full if as few as 80% of the pupil places are occupied. This is termed 80% loading. This same 200-pupil school would have a percent occupancy at 80% loading of 62.5% ($200 \div (400 \times 0.8) \times 100$). The following points should be noted:

1. Only those schools that could be matched by computer on the School Plant file and the 1976 September Report file are included. The number of pupils and schools that are "missing" may be determined for any particular board by comparing the total shown here with the board totals from the 1976 September Report.
2. Junior high schools, notably in North York and East York, present a special problem in that they are treated on the School Plant file as a single school assigned to the elementary panel whereas on the September Report file, they are reported as two schools - a grade 7 and 8 elementary school and a grade 9 secondary school. Thus the elementary school appears to have a surplus of pupil places while the secondary school cannot be matched and is therefore not included in the output.
3. French and English schools located in the same building present a similar problem. The School Plant file does not determine the sharing of the building between the French and English schools. Thus, one of the schools on the September Report file (there is no pattern as to which one) is matched and appears to have a surplus of pupil places while the other cannot be matched and is therefore not included in the output.
4. Grade 9 and 10 separate school grades that are located in private schools and are therefore noted for grant purposes as leased space, are not included on the School Plant file and therefore do not appear in the output. This situation is most prevalent in the Metro Toronto Separate School Board.
5. Portables are not included in the calculation of pupil places.
6. Kindergarten classrooms are noted on the School Plant file at 40 pupil places - 20 pupils in the morning session and 20 pupils in the afternoon session. This rating is appropriate when counting half-time kindergarten pupils as pupils (i.e., headcounts) but is inappropriate for full-time kindergarten. Thus, schools with full-time kindergarten classes appear emptier than they actually are.
